

# Break out session 11.03.2010

- What do the presentations had in common?
  - Great potential
  - Project-wise approaches
  - Focus on man-made structures, in particular buildings
  - Sexy visualization (partly beyond data sets)
- What was missing from the presentations?
  - Data models
  - Meta data
  - Maintenance of data
  - Consistency of different data sources
  - Managing reference data
  - Sustainability
  - Others than buildings (vegetation, rural areas, topographic features)
